Experience

SecureBags (March 2023 - Present)

Senior Product Designer / Design Engineer

- Promoted from Senior Product Designer to Design Engineer based on demonstrated ability to ship production-quality code alongside design work.
- Pioneered an integrated workflow using Cursor, React, Chakra UI, and MCP to push Figma designs directly into production; partner with AI tools throughout the process—from early design explorations and feature ideation through front-end implementation—collapsing traditional handoff delays.
- Inherited a fragmented design ecosystem lacking scalability; led the creation of a modular design system in Figma with reusable, dynamically structured components—reduced design inconsistencies and cut design-to-development delivery time by 40%.
- Joined as Founding Designer when no design infrastructure existed; established design foundations, workflows, and cross-functional processes from scratch that successfully scaled through the company's rapid growth phase.
- Owned complete UX/UI responsibility for a new SaaS platform; designed all major features from initial research and wireframing through high-fidelity design and developer handoff—built core experiences including onboarding, account management, dashboards, lending workflows, and integrations that remain the product's design standard.
- Identified operational bottlenecks causing manual overhead for the support team; designed and built internal back-office interfaces in Retool for financial reviews, customer onboarding, and operations—reduced manual work by 35%.
- Tasked with improving web presence and lead generation; designed and implemented landing pages and the institutional website in Webflow and Framer—drove measurable increases in visitor engagement and conversion rates.
- Partnered with the product team to diagnose friction in user journeys; streamlined onboarding and key user flows—reduced drop-off rates and improved customer retention.
- Scoped, managed, and delivered end-to-end product initiatives in collaboration with engineers, PMs, and stakeholders—consistently aligned priorities, defined requirements, and executed launches on schedule.
- Developed institutional brand identity and digital assets, ensuring consistent visual language across product, marketing, and sales channels.
- Extended impact beyond design by shipping production-ready React components and front-end improvements directly into the codebase.

Suflex (August 2020 - January 2023)

Product Designer / Lead Product Designer

- Promoted to Lead Product Designer based on design impact and cross-functional influence; took ownership of day-to-day design operations, coached junior designers on craft and process, and presented design direction to stakeholders and engineering leadership—elevating design's strategic voice within the organization.
- Joined as Founding Designer with no existing design infrastructure; built design foundations, processes, and a collaborative team culture from the ground up that enabled product and design teams to scale effectively.
- Led design for two SaaS products (B2B and B2C) from initial concept through MVP launch; owned the complete UX/UI lifecycle including discovery, research, journey mapping, prototyping, high-fidelity design, and developer handoff—delivering market-ready products on both tracks.
- Identified inconsistencies and inefficiencies slowing feature delivery; established the Suflex Design System with a unified component library and design guidelines—reduced feature delivery time by 30% and ensured cross-platform visual and interaction consistency.
- Partnered closely with engineering and product management to align roadmaps, scope initiatives, and incorporate user feedback into iterations—contributed to achieving product-market fit and smoother go-to-market execution.
- Championed continuous improvement after launch; drove usability enhancements and data-driven refinements based on user behavior and feedback—increased product adoption and retention metrics.
- Served as the connective layer between design, engineering, and business leadership; balanced user needs against technical feasibility and strategic priorities to drive aligned, actionable decisions across teams.

Grafite Design (January 2015 - January 2025)

Product Designer / Brand Designer

- Built a diverse portfolio serving clients who needed distinctive market positioning; created over 40 brand identity and strategy projects—delivered comprehensive visual identities that helped small businesses, startups, and NGOs establish credible, differentiated brand presence.
- Engaged by clients across Tech, Food, Legal, Finance, Medical, and Home industries, each with unique audiences and constraints; adapted design approach to sector-specific needs—developed versatile problem-solving skills and broad commercial awareness applicable to any domain.

- Took on end-to-end product design responsibility for clients lacking in-house design capability; designed and delivered over 10 product design projects from style guide definition through complete UI/UX—enabled clients to launch polished, user-centered digital products.
- Worked across varied tech stacks and platform requirements; constructed production-ready interfaces using Material Design, Human Interface Guidelines, Tailwind CSS, Chakra UI, and NaiveUI—ensured designs were technically feasible, consistent with platform conventions, and straightforward for engineering handoff.

Tools

Figma, Cursor, v0, VS Code, Retool, Webflow, Framer, Github, Zeroheight, Zeplin, Notion, Slack, Jira, Miro, Click Up, Confluence, Hubspot, Hotjar, Linear, Loveable, Intercom, MagicPath.

Skills

UI Design, UX Design, Product Design, Brand Design, Userflow, Prototype, Visual Design, Information Architecture, Responsive Design, Qualitative Research, Quantitative Research, User Interview, Atomic Design, Agile Methods, Presentation, Styleguide, Design Systems, HTML, CSS, JavaScript, Tailwind.

Education

Visual Design for Digital Products

Aprender Design - April 2025

Crafting Narratives and Presentations

Aprender Design - April 2025

Design Circuit 2.0

Design Circuit - March 2025

AI Creator

Human Academy - November 2024

Framer Skills

Imagination - June 2024

Brand-Driven Interfaces

Aprender Design - February 2024

Product Led Growth

Produtos Incríveis - December 2023

Product Discovery

Produtos Incríveis - December 2023

Scaling Design Systems

TheStarter - January 2023

UI Expert

Lucas Assis - September 2022

UI Boost

Insany Design - May 2023

Bachelor of Architecture and Urbanism

UniCEUB - January 2018
